DESCRIPTION

CLEAN EYES is a product developed to eliminate unsightly tear stains in those breeds of dogs and cats that suffer from it (chronic epiphora).

It also helps eliminate the spots in the mouth and on the hands produced by the lick.

TARGET SPECIES

Dogs and cats.

INDICATIONS

CLEAN EYES controls bacterial dermatitis caused by the moistening brought about by tearing, drooling, or licking, eliminating unsightly tear stain and the foul odor on the pet's face that sometimes occurs.

ROUTES OF ADMINISTRATION

Oral.

Sprinkle on the food of the animal to be treated.

DOSAGE

A teaspoon (2,5 gr. Approx.) every 5 kg/b.w.

Treatment: In a first stage, administer the indicated dose daily in any of the meals until the spots disappear.

In a second stage, administer every other day for a month.

Maintenance: Administer twice a week.

This treatment is indicative, it can be modified by the veterinarian.

PRESENTATIONS

Jar containing 50 gr.

WARNINGS

The product is a ready-to-use powder. Sprinkle on the food of the animal to be treated, immediately before offering the food and ensure its complete intake.

The product is not risky for public health or the environment.

Throw the container away in the rubbish bin.

Keep out of reach of children.

CONTRAINDICATIONS

Do not administer to pregnant female animals or to puppies or kittens of up to 8 weeks.

Do not administer to lactating female animals.

The use in animals sensitive to tylosin or other macrolide antibiotics is contraindicated.

Rarely, it can cause mild gastrointestinal symptoms (diarrhea, anorexia).

In these cases, please, interrupt the treatment.

STORAGE

The storage temperatures should be between 5 and 25 °C
